

When the guide is on screen: (these functions only work when the guide is showing on the screen)

Red Button: weather pops up on top corner (while it is up, you have options to see forecast (green button) or radar (yellow button))

Green Button: some channels have a “restart” feature – when you hit the green button while on a channel showing a green circle, the program will start from the beginning – you do not need a dvr for this feature.

Yellow Button: Search – this will search through the guide for all times the program is on again.

Blue Button: Guide Filter – every time you hit the blue button, the guide will change based on the filter, (ex: subscribed channels only, movies, news, etc.)

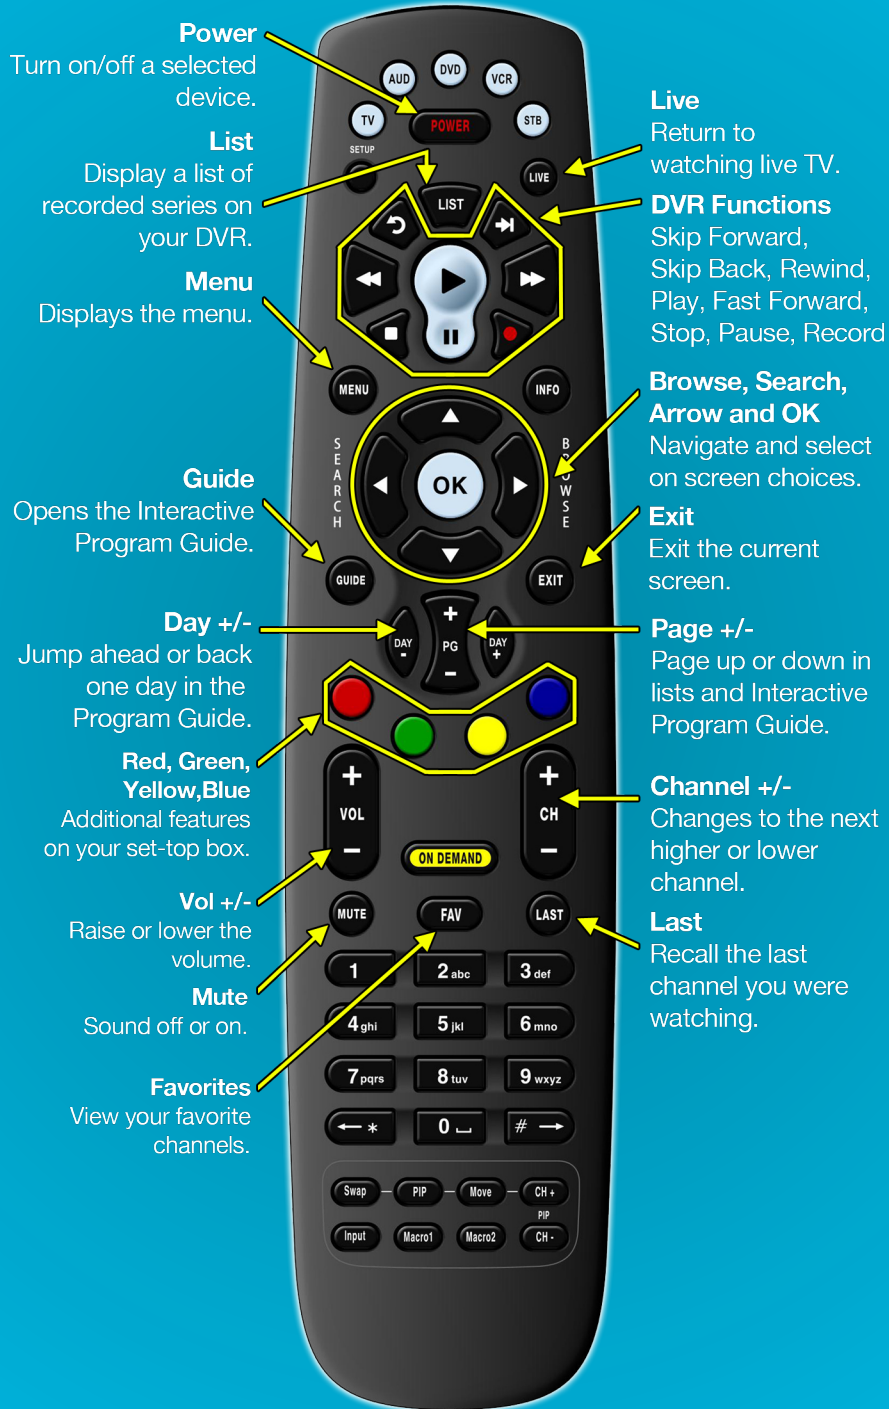

When you are not on the guide: (just watching a program)

Red Button: no function

Green Button: shows recent calls

Yellow Button: Apps! What’s Hot: This will show you the most popular programs other subscribers are watching. Weather, & Games.
